Apogee 1000^{PLUS}

DIGITAL COLOR DOPPLER
ULTRASOUND IMAGING SYSTEM

Cost-Effective Beyond Your Imagination

Apogee 1000[™] is a highly cost-effective entry-level ultrasound imaging system. With its lightweight, splash-proof, and dust-proof design, it adapts well to bedside examinations, emergency rescue, and other challenging environmental settings. Powered by the advanced Realview⁺ platform, it provides satisfactory image quality, comprehensive applications, and streamlined workflow, offering enhanced operational experience for primary healthcare.

- 01 15.6" high-resolution screen
- 02 Up to 180° foldable range, adapts to your view
- 03 Magnesium alloy casing, lightweight and durable
- 04 Cleanable keyboard panel, splash-proof and dust-proof
- 05 USB 3.0 / Type-C / HDMI ports with protective cover
- 06 Aviation-grade power port, stable and reliable
- 07 Built-in battery, long-lasting and detachable
- 08 1 probe connector, upgradable to 4 with probe extender

- 09 Height adjustable
- 10 4 probe holders
- 11 Lockable swivel casters, stable and flexible to move

Advanced Realview⁺ Platform, Upgraded Performance

Tailored Filter achieves **high image contrast** by filtering noise and extracting effective information from the full frequency band and different depths.

W-Fusion integrates information from multiple frequency to reach **better penetration and resolution performance**.

Nanoview reduces noise and artifacts, and purifies tissue edges to **improve contrast resolution** for abdominal examinations.

Smooth Workflow, Enhanced Efficiency

Practical Applications, Optimized Clinical Value

Auto Flow

Auto Flow automatically adjusts the sampling frame to better capture the blood flow signal, while **Auto Fit** intelligently optimizes the image display through one click.

Auto OB

Auto OB automatically measures the fetal biometric results (e.g. HC, BPD, FL) in standard sections, while **Auto NT** measures the thickness of nuchal translucency.

VS Flow

VS Flow is highly sensitive to low velocity blood flow signal and especially suitable for superficial blood flow examination.

Panoscope

Panoscope displays image information for extensive tissue, offering abundant information of the relationship between the lesion and surrounding tissues.

Needle Enhancement

Needle Enhancement improves the visibility of the needle position during biopsy procedure for enhanced operation precision.

Apogee 1000[™] offers fundamental solutions for **routine cardiac examinations**, meeting the essential requirements of primary healthcare.
