

All-Round Diagnostic Capabilities within Reach

Leveraging the latest MedCore imaging platform powered by MAI, A30Exp is super versatile in both general check-ups and specialized examinations with intelligent solutions. It demonstrates outstanding image performance and provides seamless workflow to ensure excellent diagnostic experience. The AI-powered functions aim to reduce the dependency on operators and minimize missed diagnosis, therefore alleviating the heavy daily workload for healthcare professionals.

Elevate Your Capability with AI Power

Intelligent Applications for Radiology

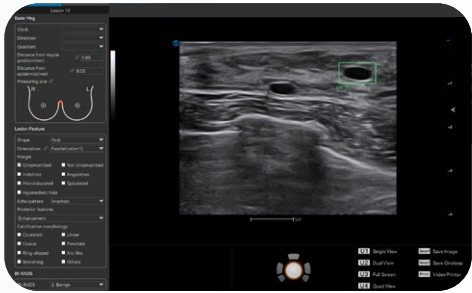

Smart Solution Kit for OB / GYN

Auto Thyroid/ Auto Breast

Auto Thyroid and **Auto Breast** automatically detect lesions, capture images, and provide suggested feature analysis with TI-RADS/BI-RADS classification.

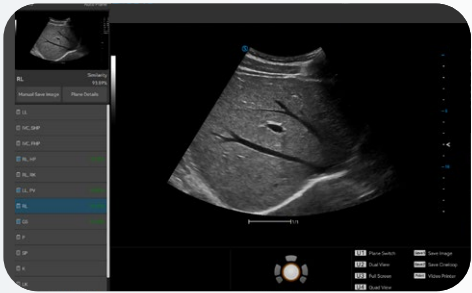

Auto Thyroid

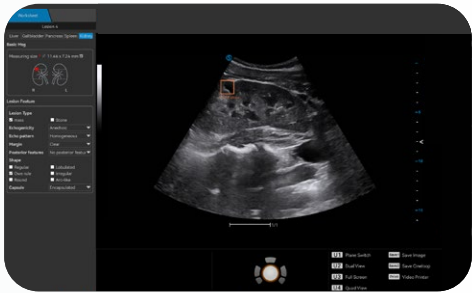

Auto Breast

Auto ABD

Auto ABD enables automatic identification of standard sections of the organs, and supports intelligent lesion detection, feature description, and measurement.

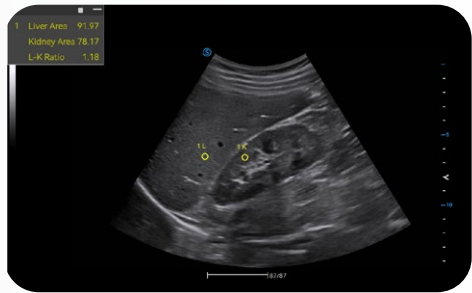

Identification of standard section

Lesion detection & analysis

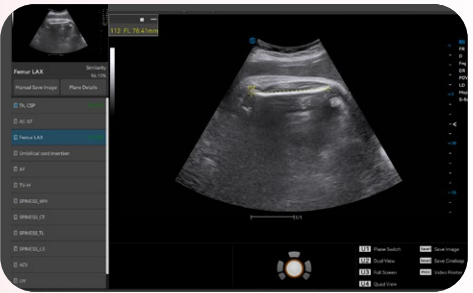

Auto HRI

Auto HRI enables objective and quantitative analysis of hepatic steatosis with automatic sampling, reducing reliance on operator's experience.

Auto OB Plus

Auto OB Plus identifies standardized sections required for different gestational period screenings, automatically saves the optimal images, and measures common fetal biometric results in seconds.

Auto NT

Auto NT automatically identifies and measures the thickness of the fetal nuchal translucency.

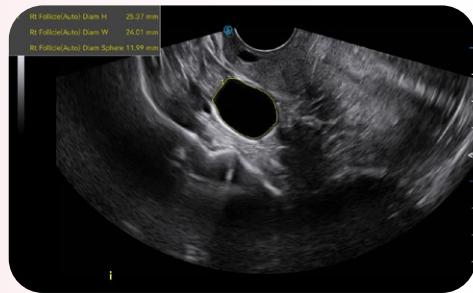

4D Pro

4D Pro includes tools such as nSlice and Any Cut to improve the visualization of fetus and enable editing to minimize interference during diagnosis.

Auto FLC

Auto FLC automatically detects, envelops, and measures the biggest follicle for reproductive evaluation.

Seamless Operational Experience

MyWorkflow supports highly customized pre-set workflow, improving efficiency of frequently conducted scanning process.

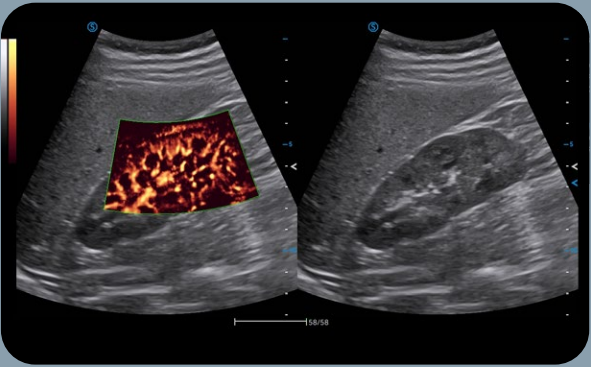

Voice Assistance follows voice commands to perform operations.

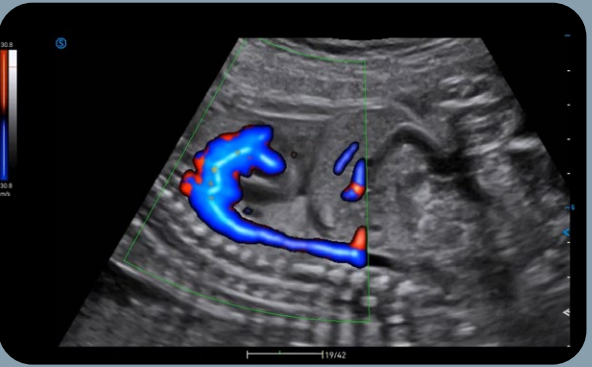

Voice Annotation records voice with cine and transcribes to text for annotation and report writing.
